

HOW TO MEASURE A BIRD'S BILL

How to measure bill morphology

HOW TO READ THE CALIPERS

Step 1: Find the red notch

Step 2: Chose the 10s digit DIRECTLY TO THE LEFT OF THE RED NOTCH. In this example, the notch is greater than 10 but less than 20 so we chose 10 = 10

Step 3: Find the black arrow on the dial

Step 4: Our arrow sits between 6 and 7. Because it is greater than 6 but less than 7, we chose 6. Add that to the 10 we selected above = 16

Step 5: Count the number of black lines after 6. In this example, there are 4. = 16.4 mm
